

RAVIBHARATHI V

FULL-STACK DEVELOPER

☎ +91 7550068435 | ✉ ravibharathiv410@gmail.com | 📍 Madurai, TN | [🌐 LinkedIn](#) | [🐙 GitHub](#)

Computer Science Engineering student specializing in Full-Stack Development and AI-driven applications, with hands-on experience building scalable web platforms, real-time distributed systems, and computer vision solutions. Proficient in React.js, Node.js, FastAPI, REST APIs, PostgreSQL, and TypeScript, with a proven track record of delivering production-ready applications through competitive hackathons and cross-functional team collaboration.

EDUCATION

B.E. in Computer Science – Current CGPA: 7.86

2023 – 2027

PSNA College of Engineering and Technology, Dindigul

Higher Secondary – 90.33% in Final Boards

2022 – 2023

PSY Matriculation Higher Secondary School, Madurai

EXPERIENCE

Full Stack Developer | Scribe AI | SaaSathoN'26 Winner

- Engineered end-to-end AI-powered SaaS features using React.js, TypeScript, FastAPI, REST APIs, and WebSockets, accelerating real-time workflow efficiency and production deployment scalability.
- Spearheaded backend performance optimization within sprint-driven Agile MVP cycles, enabling on-time product delivery across a 36-hour hackathon lifecycle.
- Generated \$100+ in product revenue and secured Rs. 40,000 first prize at a national-level SaaS hackathon through rapid MVP execution and product validation.

PROJECTS

Net-Sentinel : Autonomous AI Ops Platform

[\[LINK\]](#)

- Architected a real-time AI-powered network monitoring platform using React.js, FastAPI, WebSockets, and AI/ML models, delivering sub-100ms anomaly detection and predictive analytics at scale.
- Designed and deployed AI-assisted network insights, topology visualization, and automated remediation logging to reduce mean time to resolution (MTTR) and strengthen incident response efficiency.

CollabBoard : AI-Powered Real-Time Collaborative Whiteboard

[\[LINK\]](#)

- Engineered a real-time collaborative whiteboard using React.js, Yjs (CRDT), WebSockets, and Konva.js, achieving conflict-free multiplayer synchronization and low-latency collaboration at scale.
- Leveraged GPT-4o Vision and ELK.js to automate AI-powered sketch-to-diagram generation, reducing manual diagramming effort and accelerating technical documentation workflows.

Code Arena : Real-Time AI Coding Battles

[\[LINK\]](#)

- Architected a horizontally scalable real-time coding battle platform using React.js, Node.js, TypeScript, Socket.IO, and PostgreSQL, supporting multiplayer matchmaking and live session management.
- Developed and integrated JWT authentication, real-time leaderboards, matchmaking algorithms, and voice-assisted coding features to maximize platform scalability, accessibility, and user engagement.

SKILLS

Languages: Java (OOP), Python, JavaScript (ES6+), TypeScript, SQL

Frontend & UI: React.js, Next.js, Tailwind CSS, Vite, Zustand, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, Flask, RESTful APIs, WebSockets, Microservices

AI/ML & Computer Vision: OpenCV, YOLOv8, GPT-4o Vision, ELK.js, Three.js, LLM Integration

Databases & DevOps: PostgreSQL, MySQL, MongoDB, Redis, Git, Docker, CI/CD, Agile/Scrum

ACHIEVEMENTS

- Winner – SaaSathoN'26** | 1st place and Rs. 40,000 prize in a 36-hour national SaaS hackathon at SSN College of Engineering, shipping a production-ready AI product.
- Winner – E-Horyzon 2026** | 1st place in Idea Pitching Competition at Kongu Engineering College for innovative full-stack product concept and technical feasibility.
- Winner – AURISTRA'26** | 1st place in a 48-hour Hackathon at Takshashila University, delivering a complete working prototype under competitive sprint conditions.
- Solved **150+ Data Structures & Algorithms (DSA) problems** on LeetCode, demonstrating strong algorithmic thinking and software engineering fundamentals. [\[LINK\]](#)

CERTIFICATIONS

- Introduction to Generative AI – Google Cloud** | March 2026
- AWS Generative AI Foundation – AWS Academy** | April 2026
- MongoDB University (8+ Verified Badges)** | July 2025
