

RAVIBHARATHI V

FULL-STACK DEVELOPER

Portfolio | [in LinkedIn](#) | [GitHub](#) | [☎ +91 7550068435](#) | [✉ ravibharathiv410@gmail.com](#) | [📍 Madurai, TN](#)

Motivated Full-Stack Developer pursuing a B.E. in Computer Science (Graduating 2027) seeking a Full-Stack Development internship. Shipped 3 production-ready AI-powered web applications using React.js, Node.js, FastAPI, TypeScript, PostgreSQL, and WebSockets. 3× national hackathon winner with proven ability to deliver scalable REST APIs, real-time systems, and LLM-integrated products under Agile sprint conditions.

SKILLS

Languages: Java (OOP), Python, JavaScript (ES6+), TypeScript, SQL

Frontend & UI: React.js, Next.js, Tailwind CSS, Vite, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, Flask, RESTful APIs, WebSockets, Microservices

AI/ML & CV: OpenCV, YOLOv8, GPT-4o Vision, ELK.js, LLM Integration

Databases & DevOps: PostgreSQL, MySQL, MongoDB, Redis, Git, Docker, CI/CD

EXPERIENCE

Full Stack Developer | Scribe AI | SaaSathoN'26 Winner

- Engineered 5+ end-to-end AI-powered SaaS microservice endpoints using React.js, TypeScript, FastAPI, REST APIs, and WebSockets, cutting real-time workflow latency by 40% and improving production deployment scalability.
- Spearheaded backend performance optimization across sprint-driven Agile MVP cycles, enabling on-time delivery within a 36-hour lifecycle with zero post-launch rollbacks.
- Generated \$100+ in product revenue and secured Rs. 40,000 first prize at a national-level SaaS hackathon through rapid MVP execution and product validation.

PROJECTS

Distributed-Trace: Autonomous AI Ops Platform [\[LINK\]](#)

- Architected a real-time AI-powered network monitoring platform using React.js, FastAPI, WebSockets, and AI/ML models, delivering sub-100ms anomaly detection across 10+ simulated network nodes with predictive analytics at scale.
- Designed and deployed AI-assisted network insights, topology visualization, and automated remediation logging, cutting average MTTR by 35% and strengthening incident response efficiency.

CollabBoard : AI-Powered Real-Time Collaborative Whiteboard [\[LINK\]](#)

- Developed a real-time collaborative whiteboard using React.js, Yjs (CRDT), WebSockets, and Konva.js, supporting 20+ concurrent users with conflict-free synchronization and <50ms collaboration latency.
- Leveraged GPT-4o Vision and ELK.js to automate sketch-to-diagram generation, reducing manual diagramming turnaround by 70% and accelerating documentation workflows.

Code Arena : Real-Time AI Coding Battles [\[LINK\]](#)

- Built a horizontally scalable coding battle platform using React.js, Node.js, TypeScript, Socket.IO, and PostgreSQL, handling 50+ concurrent sessions with real-time matchmaking and live session management.
- Integrated JWT authentication, real-time leaderboards, matchmaking algorithms, and voice-assisted coding, increasing session retention by 30% and expanding platform accessibility.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

PSNA College of Engineering and Technology, Dindigul, Tamil Nadu

Aug 2023 – May 2027

CGPA: 7.7 / 10.0

Higher Secondary Certificate (HSC) – Science Stream

PSY Matriculation Higher Secondary School, Madurai, Tamil Nadu

Jun 2021 – Mar 2023

Percentage: 90.33%

LEADERSHIP

- Cross-Functional Team Leadership:** Led a cross-functional team through product ideation, engineering, and deployment at SaaSathoN'26, coordinating frontend, backend, and AI tracks within a 36-hour sprint.
- Technical Ownership:** Independently architected and shipped 3 full-stack projects (Net-Sentinel, CollabBoard, Code Arena) from zero to production, owning system design, stack selection, and delivery decisions.
- Competitive Record:** Secured 1st place in 3 national-level competitions (SaaSathoN'26, E-Horyzon 2026, AURISTRA'26), delivering under pressure within constrained sprint timelines.

ACHIEVEMENTS

- 3× National Hackathon Winner** | SaaSathoN'26 (Rs. 40,000 prize, SSN College of Engineering), E-Horyzon 2026 (Idea Pitching, Kongu Engineering College), and AURISTRA'26 (48-hour Hackathon, Takshashila University) - shipping production-ready products across 36–48 hour Agile sprints.
- Solved **150+ DSA problems** on LeetCode demonstrating strong algorithmic thinking and software engineering fundamentals. [\[LINK\]](#)

CERTIFICATIONS

- Introduction to Generative AI – Google Cloud** | March 2026 [\[LINK\]](#)
- AWS Generative AI Foundation – AWS Academy** | April 2026 [\[LINK\]](#)
- MongoDB University** (8+ Verified Badges) | July 2025 [\[LINK\]](#)
