LinkedIn

Github

Computer Science Engineering student specializing in Full-Stack Development and AI-driven applications with hands-on experience in MERN stack, React Native, and computer vision systems. Proven ability to build scalable real-time platforms and IoT-integrated solutions through hackathons and production-ready projects.

EDUCATION

B.E. in Computer Science - Current CGPA: 7.86

2023 - 2027

PSNA College of Engineering and Technology, Dindigul

Higher Secondary - 90.33% in Final Boards

2022 - 2023

PSY Matriculation Higher Secondary School, Madurai

PROJECTS

NIRAIVIZHI - HYDROBOT [GITHUB]

- Designed an AI-powered autonomous water monitoring system using ESP32 sensors (pH, turbidity, TDS, temperature).
- Developed a React Native mobile dashboard for real-time environmental data visualization and reporting.
- Implemented ML-based anomaly alerts to detect water pollution and environmental threats.
- Enabled authority dashboards for monitoring water bodies and managing field reports.

Code Arena: Real-Time AI Coding Battles [GITHUB]

- Built a real-time multiplayer coding arena supporting live coding battles.
- Implemented voice-to-code functionality using Web Speech API for accessibility.
- Developed an ELO ranking and AI matchmaking system for competitive programming tournaments.
- Integrated OpenCV handwriting recognition for multi-input coding interaction.

Face Recognition Security System [GITHUB]

- Developed a biometric authentication system combining facial recognition and traditional login.
- Implemented real-time face detection and verification for secure authentication.
- Designed database-driven user access control with secure credential storage.

SKILLS

- Languages:** Java(OOP), Python, Javascript, SQL
- Frontend & Mobile :** React.js, React Native
- Backend & APIs:** Node.js, Express.js, Rest APIs, Flask
- AI/ML:** ELO Ranking, OpenCV , ML Alerts
- DB Management:** PostgreSQL / MySQL, MongoDB

ACHIEVEMENTS

- 2nd Runner-Up — HeisenHack 2025**
24-hour national hackathon at SRM Institute of Science and Technology.
- #1 Winner — E-Horyzon 2026**
Idea Pitching Competition at Kongu Engineering College.

CERTIFICATIONS

- Python for Beginners | Microsoft Learn** | March 2026
- IBM Skills Network / Cognitive Class** | October 2025
- MongoDB University** (8+ Badges) | July 2025
